

USA Health University Hospital

Companion to Pulse Diagnostic [54aae6f3-42d6-4613-a76d-c8c85eeb7fcc] — Internal use only — Do not distribute to customer

66 B— moderate AI visibility

USA Health University Hospital's Credentials & Recognition is one of its strongest signals — but Reputation is actively suppressing its AI recommendation capture.

3 KEY FINDINGS

▲ GAP

WHAT WE FOUND

USA Health University Hospital's primary listing shows 2.8★ across 375 reviews — a reputation score that works against AI recommendation capture.

WHY IT MATTERS

AI provider recommendation engines weight primary listing rating and review volume heavily; a weak front door suppresses confidence and reduces recommendation frequency.

WHAT TO SAY

"2.8 stars and 375 reviews — that's a front door that's working against USA Health University Hospital. AI tools lead with this signal for patient-facing queries."

Composite: Reputation

▲ GAP

WHAT WE FOUND

USA Health University Hospital scores 72/100 on Access & Fit — directory listings and NAP consistency have meaningful gaps.

WHY IT MATTERS

Inconsistent name, address, or phone data across directories is a suppression signal that AI tools use to reduce recommendation confidence.

WHAT TO SAY

"USA Health University Hospital appears in multiple directories with conflicting information. AI tools can't confidently recommend a provider when its own data disagrees with itself."

Tier: Access & Fit

✓ STRENGTH

WHAT WE FOUND

USA Health University Hospital scores 76/100 on Credentials & Recognition — credentials and recognition signals are indexed in AI-accessible sources.

WHY IT MATTERS

Board certifications, recognized affiliations, and clinical awards are heavily weighted by AI tools for procedural and specialist queries.

WHAT TO SAY

"Your credentials are visible and verifiable — that's a differentiator when AI tools rank specialists."

Tier: Credentials & Recognition

OBJECTION HANDLING

"Your ratings and reputation look strong already — why do you need this?"

Strong ratings and review counts are table stakes. What separates top AI-recommended providers isn't just reviews — it's whether AI tools reliably resolve the entity, link physicians, and attribute the reputation to the right location. Those signals operate below the surface of what looks correct to you.

"We're already happy with our Google presence — what else is there?"

Google search rank and AI recommendation capture are separate systems. AI tools query structured indexes and entity resolution data, not your Google ranking. A practice can rank well on Google and still be underrepresented when patients ask an AI tool for a recommendation.

THE ASK

To move the needle on AI recommendation capture, start with your website. This addresses the gap in Reputation and creates measurable score lift within 90 days.
